Tony Dunsworth
Western Governors University

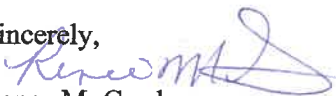

Dear Mr. Dunsworth,

We are happy to partner with the Western Governors University and your studies to participate in the research project. This is exciting time and data analytics is a great topic that will assist the Department of Emergency and Customer Care Center (DECC).

This letter authorizes you access to the computer aided dispatch (CAD) data that has been identified in your proposal. No identifying information will be used in this project. Before release of the information or project draft, the Director of DEC will have the opportunity to review the project paper. Please allow sufficient time for the review and feedback.

I am looking forward to reviewing your work and to see how this could impact the community.

Sincerely,

Renee M. Gordon
Director
